

Here are some sample questions that you can use for ad hoc reporting based on the provided bus sales data:

1. Which bus type has the highest total sales?
2. What is the total sales and profit for each dealer, and how do they vary across different dealerships?
3. Which bus model contributes the most to overall sales?
4. How does the total sales and profit vary for buses with different cylinder counts?
5. Manufacturer Comparison For each region, compare the total sales and profit of Mercedes and Volvo buses.
6. Product Prices-Create a bar chart displaying the total price for each bus model.
7. Sales and Profit by Region - Represent the total sales and profit in a stacked column chart, breaking down the data by region.
